123-13

BLUE, SPRAYABLE, EPOXY CONFORMAL COATING

DESCRIPTION: 123-13 is a blue, one component, epoxy conformal coating. This product is designed specifically for low viscosity/spray coating applications. 123-13 can be used up to 0.125" thick; for thicker coatings, multiple coats may be necessary. 123-13 features excellent electrical insulation properties as well as long pot life at room temperature. 123-13 is a sprayable version of 123-10.

MIXING INSTRUCTIONS: Premix in original container prior to using to resuspend any fillers, which may have settled during storage. Further thinning and cleaning can be accomplished using CMI#113-39 thinner.
