124-22A/B119-44

ANISOTROPIC CONDUCTIVE EPOXY ADHESIVE

DESCRIPTION: 124-22A/B119-44 is a two component, solvent-resistant, anisotropic conductive ink, coating and adhesive. This product features excellent adhesion to Kapton, Mylar, glass, polycarbonate and a variety of other substrates. Unlike conventional conductive materials, this product is very resistant to methyl ethyl ketone. It is also very resistant to scratching and creasing. Applications for 124-22A/B119-44 include, but are not limited to, conductive splicing of ribbon cables, PTF circuits, and electrical attachment of surface mounted devices. This product is useful in application where shorts between closely spaced contacts is a concern.
